Score Report

Client name: Sample Client

Client ID: RCDS2

Gender: Female

Grade: 2

Age: 7

School: Marshall Elem

Test date: 08/12/2013

Normative group: Total standardization sample

This report is intended for use by qualified professionals only and is not to be shared with the examinee or any other unqualified persons.

Validity of RCDS-2 Results

It is important to carefully review the completed RCDS-2 test protocol. In particular, pay attention to items left blank, as these may indicate that the examinee has deliberately attempted to avoid disclosing specific behaviors or symptoms. Note unusual response patterns and question the validity of the protocol.

As a final check for invalid responding, examine the responses to three pairs of items (1 and 7, 9 and 12, and 7 and 30). Because the item content in each of these pairs is opposite but the items are logically very similar, the same score at extreme ends of the scale for items within any of these pairs suggests an invalid protocol.

The examinee's responses to these three pairs of items suggest consistency in responding.

RCDS-2 Score Summary Table

Scale	Raw score	T score	Percentile rank	At or above cutoff	Missing responses
Total	64	59	86	No	0

Note. "---" indicates a scale that is invalid due to an excessive number of missing item responses.

*Prorated score.

RCDS-2 Critical Items

No critical items received a clinically significant endorsement.

RCDS-2 Item Responses

Item	Response	Item	Response
1	Sometimes	16	Sometimes
2	A lot of the time	17	All the time
3	Sometimes	18	Almost never
4	Almost never	19	Sometimes
5	Sometimes	20	Sometimes
6	A lot of the time	21	Almost never
7	Sometimes	22	Sometimes
8	Sometimes	23	Sometimes
9	Almost never	24	A lot of the time
10	Sometimes	25	A lot of the time
11	Almost never	26	A lot of the time
12	Sometimes	27	Almost never
13	Almost never	28	Almost never
14	Almost never	29	Sometimes
15	A lot of the time	30	Neutral

Note. "---" indicates a missing response.
