

## Professional Tool Suite MHS Smartlink (V5) Software

Your single source for client management, Smartlink provides you with a comprehensive case management system that:

- Runs behind the scenes so that you can access tools directly from your Windows desktop.
- Captures detailed and user-defined client and assessor information.
- Supports unrestricted data on standalone computers and intranets; and even the Internet can link with your existing databases using a Software Development Kit.
- Converts data from PsychManager Lite.
- Uses proven technology such as SQL client/server architecture and ActiveX components.

With Smartlink, you have a wealth of convenient options at your fingertips. You can:

- Administer numerous assessments without re-entering client information.
- Store notes in client files.
- Generate detailed administrative reports.
- Consolidate and secure data.
- Order additional assessments and uses over the phone.

If you have previously purchased and installed an assessment that ran the PsychManager Lite platform and you are now purchasing the upgrade of the same assessment for Smartlink, you will be sent a conversion program that will help you convert your data. It is recommended that you postpone upgrading until all the assessments you need are available for Smartlink. We invite you to contact us for further details about your upgrade options.

**Smartlink software is free** with any purchase of Version 5 assessment software. It includes Administrator – a program that manages user accounts and provides security options to ensure the confidentiality of your clients files.

**MHS Administrator** is included in the MHS Professional Tool Suite. It allows you to set up multiple caseloads and set usernames, passwords and access rights. By setting up specific caseloads and usernames and by limiting access to particular caseloads or features of the program, you can ensure the security of your client files and prevent modification to or loss of valuable data. You can also monitor the usage of reports with the Activity Trail feature.

Administrator is automatically installed on standalone installations of MHS Professional Tool Suite Version 5 assessments. It is also typically installed on the network server if you perform a server installation.

System Requirements for Smartlink and Version 5 software are:

- A Pentium processor or higher
- Microsoft Windows 2000 Service Pack 4, Microsoft Windows 2003 Service Pack 1, Microsoft Windows XP Service Pack 2 or Microsoft Windows Vista
- A CD-ROM drive
- VGA colour monitor (SVGA recommended)
- A USB port
- At least 192 MB of RAM (512 MB recommended)
- Arial font Family installed

The following tools are available in Version 5 format for the MHS Professional Tool Suite with Smartlink;

- Anger Disorders Scale (ADS)
- Butcher Treatment Planning Inventory (BTPI)
- Conners' Adult ADHD Rating Scales (CAARS)
- Children's Depression Inventory (CDI)
- Health Dynamics Inventory (HDI)
- Conners' Kiddies Continuous Performance Test for Windows (K-CPT)
- Level of Service/Case Management Inventory (LS/CMI)
- Level of Service Inventory – Revised (LSI-R)
- Level of Service Inventory – Revised: Screening Version (LSI-R:SV)
- Hare Psychopathy Checklist- Revised: 2<sup>nd</sup> Edition (PCL-R:2)
- Symptom Assessment – 45 (SA-45)
- Clarke Sexual History Questionnaire – Revised (SHQ-R)
- Youth Level of Service/Case Management Inventory (YLS/CMI)
